

TAKING YOU HOME, NATURALLY.  
SINCE 1976

To All,

Thank you for your hospitality on our recent visit to Wisconsin Log Homes headquarters in Green Bay, Wisconsin. We were hosted by Nate Janczak the General Manager of WLH, he was very informative and just a pleasant person to be around. Nate took his time to explain everything to my wife as she has never lived in a log home as I have, and this was a true eye opener for her. When we left my wife wanted to start building right away she did not want to wait, this tells me that WLH did an outstanding job because she is not an impulsive person! We had an excellent time looking at the homes in the Green Bay area that had been built by WLH, this gave us some very good ideas when we sat down to design our home later that day. We were also impressed with Brian who helped us along with Nate on the design plans that day.

I have been looking for the past 15 years for a log home company that offers the buyer everything from start to finish (including the build) and there are not many of these companies out there. It took me a lot of calls and painstaking research to determine apples to apples who offered the best complete turnkey package in the business. We settled on WLH and set up this appointment to meet with them and possibly design our future home. I can tell you that after spending that day with these folks it just reaffirmed with us that this company was the right choice to build our dream home. We had a chance to meet Dave and Kathy Janczak, founders of WLH, they were first class down to earth good people, and now we know where Nate gets all his personality from. All the folks that we met with that day from WLH were very classy and knowledgeable people and we are sure glad this is the company that we chose to build our home.

I realize that our final product is a year and a half away but if the work and quality of Wisconsin Log Homes is anything like the employees we met that day then our home will be a quality built, beautiful home!

Thanks again for everything that day, we sure enjoyed ourselves and are looking forward to the building process and working with all the quality folks at Wisconsin Log Homes.

Sincerely,

*Tim & Tracy Rood*
